- Tactile: 40%

## Emotional Intelligence Test

The third test I took was an [Emotional Intelligence Test](#) that gave me a score of 56%.

### Snapshot Report

Emotional Identification, Perception, and Expression **56**

You appear to have at least some basic skill when it comes to identifying, perceiving and expressing emotions in yourself and others. However, there is still a great deal of room to improve on this core ability. Review the results below for further information in order to identify where improvement is recommended. By improving your skills in this area of emotional intelligence, you will be in a better position to read others, understand how they feel, and effectively identify your own emotions. These skills form the basis of your ability to relate to others as well as your ability to understand yourself.
